Gobi+ 640 Series

*SMALL, HIGH PERFORMANCE UNCOOLED
THERMAL CAMERA*

KEY FEATURES

COMPACT SIZE

**TEMPERATURE CALIBRATIONS FOR
THERMOGRAPHIC APPLICATIONS**

EASY CONNECTIVITY

The Gobi+ 640 is based on an uncooled microbolometer detector with a 640 x 480 pixel resolution.

The Gobi+ 640 delivers frame rates up to 60 Hz and offers lower detector NETD options (<30 mK available upon request). It is available with a GigE Vision interface.

Gobi+ 640 Series

KEY PERFORMANCES

Image format / Pixel pitch	640 x 480 pixels / 17 μ m
Integration type	Rolling shutter
Spectral range	8 - 14 μ m
Max frame rate (full frame)	60 Hz
Power consumption	4.6 W
Power supply voltage	DC 12 V or PoE (Power over Ethernet)

FUNCTIONS & INTERFACES

Command and control	GigE
Ambient operating temperature range	From -40°C to +60°C; also available in temperature range 0°C - 50°C
Storage temperature	From -40 °C to +85 °C
Detector NETD	<50 mK (at 30Hz, 300K, F/1); <30 mK (available upon request)
Shock / Vibration	40 g, 11 ms, MIL-STD810G, MIL-STD883J / 5 g (20 to 2000 Hz), MIL-STD810G/MIL-STD883J
